Workshop Endodontics: use of CTBC in daily dental practice (X-Ray / DTV)

Workshop Endodontics: use of CTBC in daily dental practice (X-Ray / DTV) 

ORA: 9.00-13.00

The introduction of cone-beam computed tomography (CBCT) and three-dimensional visualization of the jaw in endodontics represents an important new development in endodontic diagnosis and treatment planning. The advantage of CBCT over conventional orthopantomography is substantial.

The theoretic advantages and limitations of CBCT are covered out, based on latest evidence and illustrated with clinical cases.
