Workshop Endodontics: use of CTBC in daily dental practice (X-Ray / DTV)

Luni, 20 Februarie 2017 14:04

Dr. Tom Schloss
(University, Dentistry)

Adjunct Associate Professor
Department of Endodontics
University of Pennsylvania
Philadelphia, PA, USA

He is currently a board-certified endodontist and associate professor at the University of Pennsylvania.

The introduction of cone-beam computed tomography (CBCT) and three-dimensional visualization of the anatomy represented an important new development in endodontic radiography and contributed to the achievement of enhanced treatment outcomes and patient satisfaction.

The advantages and limitations of CBCT are covered, based on the latest evidence and illustrated with clinical cases.
